

On the Subject of Colo(u)r Talk

Since I'm American I guess I'll try to find someone who isn't so I can argue over which one is better. 🤖

This module consists of a phrase on a big display, an arrow which points to different colors, and a button which is used to rotate the arrow. Use the phrase to determine which direction to point the arrow to solve the module. If an incorrect arrow direction is submitted, a strike will be recorded. Note that the phrases will not change, emojis appear strangely, and numbers look like the ones on the countdown timer. The 17 colors the arrow can point to are:

S, R, O, Y, H, L, G, C, B, V, M, P, N, W, A, K and X.

Phrase:	Letter:
Color	S
Colour	R
Calor	O
Calour	Y
Cauliflower	H
Celor	L
Celour	G
Cilour	C
Cilor	B
